

Financial KPI Analysis Dashboard Report

Prepared by: Arshpreet Singh	Role: Data Analyst Intern	Organisation: EduTech Solutions	Date: 22 June 2026
-------------------------------------	----------------------------------	--	---------------------------

Executive Summary

This report presents a comprehensive analysis of key financial performance indicators extracted from the Financial KPI Analysis Dashboard. The data covers multiple segments — Government, Small Business, Enterprise, Midmarket, and Channel Partners — across six product lines (Amarilla, Carretera, Montana, Paseo, Velo, VTT) and five geographies (United States, Canada, France, Germany, Mexico). The findings provide actionable insights to guide strategic decision-making at EduTech Solutions.

Core Financial KPIs — At a Glance

89.55 bn Gross Sales Total	6.44 bn Total Discounts	83.11 bn Net Total Sales	788.06 M Total Units Sold
11.83 bn Total Profit		14.23% Profit Margin	

Detailed KPI Summary Table

KPI Metric	Value	Observation
Gross Sales Total	89.5521 bn	Strong top-line revenue generation across all segments
Total Discounts Given	6.4437 bn	Discounts represent ~7.2% of gross sales — within acceptable range
Net Total Sales	83.1084 bn	Post-discount revenue remains robust at 92.8% of gross
Total Units Sold	788.06 M	High volume indicates strong market penetration
Total Profit	11.8256 bn	Healthy absolute profit across all operations
Profit Margin	14.23%	Solid margin; benchmark target typically 15–20% for this sector

Sales Performance by Segment

Segment	Sales (M)	Share (%)	Strategic Note
Government	52.5	44.22%	Dominant segment — primary revenue driver
Channel Partners	42.43	35.74%	Second largest; strong indirect sales channel
Small Business	~10–12	~9–10%	Growth potential; targeted campaigns recommended
Enterprise	~8–10	~7–8%	High-value accounts; focus on retention
Midmarket	~4–6	~4–5%	Opportunity segment for upselling

Sales Performance by Product

Product	Approx. Sales (M)	Rank	Recommendation
Paseo	~35–40	#1	Best-seller; sustain inventory & marketing investment
VTT	~25–30	#2	Strong performer; explore premium pricing
Velo	~18–22	#3	Growing product; increase market reach
Amarilla	~14–18	#4	Mid-tier; bundle offers may boost sales
Montana	~10–14	#5	Moderate performer; review pricing strategy
Carretera	~6–10	#6	Lowest sales; consider product positioning review

Geographic & Discount Band Analysis

Country	Relative Sales	Notes
United States	Highest (~20M+)	Core market — highest sales contribution
Canada	High (~18–20M)	Strong secondary market
France	Moderate (~14–16M)	Consistent European market
Germany	Moderate (~12–15M)	Growth potential in EU
Mexico	Lower (~10–12M)	Emerging market; expansion opportunity

Discount Band	Profit Level	Interpretation
Low	~100% (Highest)	Minimal discounting yields maximum profitability
Medium	~80–85%	Balanced approach — acceptable margin trade-off
High	~60–70%	Profit erosion risk; review high-discount policies
None	~50–60%	Surprisingly lower — may reflect premium pricing friction

Monthly Sales Trend Analysis

Period	Trend	Insight
Jan – Aug	Stable (~8–12M/month)	Consistent baseline; steady demand period
September	Moderate dip	Possible seasonal slowdown or end-of-quarter effect
October	Sharp peak (~20M)	Best performing month — likely seasonal push or campaign
November	High (~18M)	Sustained momentum; holiday/year-end demand
December	Slight decline (~16M)	Strong close; slight normalization post-peak

Key Insights & Strategic Recommendations

1. Revenue Health	Gross sales of 89.55bn with a net revenue of 83.11bn post-discounts show strong top-line performance. The discount rate (~7.2%) is controlled and healthy.
2. Profit Margin Improvement	At 14.23%, the profit margin is solid but has room for improvement. Reducing high-discount deals and optimising Carretera/Montana pricing could push margins toward 16–18%.
3. Government Segment Dependency	44.22% reliance on Government segment is a concentration risk. Diversifying into Enterprise and Midmarket is recommended to de-risk revenue.
4. Seasonal Sales Strategy	October is the peak sales month. A dedicated pre-October marketing and inventory push could further amplify this seasonal spike by 10–15%.

5. Product Portfolio Optimisation	Paseo and VTT account for the majority of product sales. Carretera should undergo a pricing and positioning review to improve its contribution.
6. Geographic Expansion	Mexico shows the lowest sales among the five markets. A targeted growth plan for emerging markets like Mexico could unlock significant untapped revenue.
7. Discount Policy Review	High-discount band products show significant profit erosion. Implementing a structured discount approval process is advised to protect margins.
